

THE BRIEF

JAMES GAMBINO
PLAYGROUND ADVISOR

Moulsham Infant School made contact with Creative Play looking to completely refurbish their current playground since having major building works completed. They were looking for a large climbing frame with different entrances and exits as seen in one of our quarterly mailers. They were also looking to have Wetpour Safety surfacing and other climbing equipment.

THE DESIGN

STEVE HOGAN
PLAYGROUND DESIGNER

After listening to what Moulsham Infant School were looking for we immediately knew one of our Zenith Towers would be perfect for them, alongside Trim Trail items to create a challenging obstacle for children to overcome. A great way for children to get fit and have fun at the same time! The school had a bespoke Zenith Four in a rustic style for a natural appearance, the firefighter's pole was replaced with an additional slide, and the Shop Front panel replaced with a Net Climber. The Trim Trail was composed of a Log Walk, Tyre Crossing, Crawling Net and a Rope Walk. As Creative Play like to meet all our customers' requirements, as well as creating a bespoke Zenith Four, the school also chose to have Green and Yellow Playtec colours only, this gave the playground a great theme and looked great. To meet the BSEN 1176/1177 requirements Moulsham Infant School had Wetpour safety surfacing incorporated into the area.

PRODUCTS SHOWN

Z101A Zenith Four - Rustic
SUR101 Wetpour Safety Surfacing

CP049 Park Bench - Standard

CH116 Tyre Crossing

THE INSTALLATION

COLIN ASHTON
HEAD OF OPERATIONS

With the bespoke Zenith Four being installed we knew this would be a challenge but we rose to it and completed the installation within the required time and with minimal disruption and following the great work, Moulsham Infant School have since ordered even more from Creative Play since!
