MP104 Glockenspiel

THE BRIEF

To develop the nursery area with a range of play equipment to promote outdoor learning and improve physical activity.

As part of a two stage project, we have now completed the Nursery area which includes our Greenwood Woodlander Tower System, creative playboards, planters, sandbox, water play and creative Wetpour safety surfacing which includes an inlaid roadway with a timber arched bridge for the children to explore. Our new Greenwood tower system provides an interesting focal point with features such as a ramp with climbing grips, slide, single tower and timber pitched roof. The Wetpour Safety Surfacing also incorporates an interesting splash design around the tower to create an exciting and colourful play area for the children to enjoy all year round.
