LOCKS HEATH INFANT SCHOOL
HAMPShIRE, SO31 9NZ

THE BRIEF

Locks Heath Infant School got in touch with Creative Play as they were looking to incorporate a MUGA (Multi Use Games Area) with surfacing into their outdoor play area. They wanted to create a dedicated sports zone that could be used during PE lessons as well as break times.

With only a small space available they chose a 12m x 8m MUGA and selected Black Wetpour Safety Surfacing.

To enable a variety of games to be played in the sports area Basketball, Netball and Football court markings were laid in bright, contrasting colours.

To add a touch of personalisation, we engraved the school's name onto the two goal end backboards.

Locks Heath Infant School now have a great area for its pupils to enjoy sports and they absolutely love it!

FACTFILE

LOCKS HEATH INFANT SCHOOL reached out to Creative Play looking to add an element of both physical and imaginative play to their outdoor play space.

After meeting with the school and understanding their requirements, it was decided the best piece of play equipment to incorporate in to the area would be our Quartermaster Ship! The Ship provides a huge variety of play features and has been designed to encourage physical and imaginative play, as requested!

In addition to the Quartermaster we laid Wetpour safety surfacing to not only ensure the area meets all BSEN 1176/1177 safety standards but also create the illusion of the boat being in the sea to add that extra touch of fantasy to spark imaginative play.

Overall the development at Locks Heath Infant School met all of the requirements of the school and looks fantastic. It’s such a transformation to the outdoor space and a great project to have been a part of!

"We are very pleased with the Pirate ship and the children absolutely love it which is so important. The installation guys were amazing and interacted with our children at breaks and lunch times in a lovely manner - so much so that the teachers' commented on this."

"We wouldn't hesitate to use Creative Play again in the future if we secured any additional grant funding. Thank you so much!"
