SG007 Timber Bridge

THE BRIEF

Tenacres First School contacted Creative Play looking to redevelop their reception area. They wanted to include a mixture of play and sensory equipment along with safety surfacing.

To meet the requirements of the customers brief, we added several pieces of equipment from our sensory range including Water Play products, our Timber Sandbox and Mud Kitchen Mini. In addition to this we added 3 Playboard panels including our Painting Station and White Board, to allow children to get creative, and our Glockenspiel for children to create great sounds. Our Timber Bridge was also installed into the area to add a touch of fantasy.

To allow all weather play, we installed blue and black fleck Wetpour Safety Surfacing which added a great touch of colour and really finished off the area. A great project overall to have been a part of!
